PERSONAL PROJECTS

College Placement Management (08/2024 - 10/2020)

The Placement Management System is a comprehensive web application built to simplify the campus recruitment process. Developed using React.js on the frontend and Node.js with MongoDB on the backend, the system allows students to register, while recruiters can filter candidates and manage interviews effortlessly.

Calculator (08/2024 - 09/2024)

Developed a responsive, web-based calculator using HTML, CSS, and JavaScript. It supports basic
arithmetic operations such as addition, subtraction, multiplication, and division. Implemented real-time
input display and dynamic calculation handling through JavaScript event listeners and DOM manipulation

Peronal Blog (08/2024 - 09/2024)

Designed and developed a responsive blog website using HTML, CSS, and JavaScript to share thoughts and experiences. . HTML is used for structuring content, CSS for styling and layout design, and basic JavaScript for interactivity, such as a dynamic navigation menu and responsive elements. The blog is optimized for various screen sizes to ensure a seamless experience across devices.

Task Management (08/2024 - 09/2024)

Developed a web-based task management application using HTML, CSS, and JavaScript to organize and track daily tasks. Features include adding, editing, and deleting tasks, marking tasks as completed, and filtering tasks by status. The project focuses on responsive design and client-side data storage using localStorage for persistent task management.
